

Fortimize Advisory Services

Empowering People, Processes, and Technology

At Fortimize, we simplify the complexities of technology and data with advisory services. We guide you in defining strategies, optimizing project management, and maximizing the value of your IT projects by focusing on your people, processes, and technology.

ADVISORY OFFERINGS

Advisory & Road Mapping

We collaborate with you to create comprehensive strategies and detailed technology roadmaps that align with your goals, ensuring initiatives are both strategic and actionable.

Project Management Office & Scrum Excellence

We assess your PMO and project delivery practices, identifying areas for improvement based on industry best practices to ensure current and future project success.

Change Management

We develop and implement comprehensive strategies for planning, executing, and sustaining change initiatives, helping your team quickly adapt and maximize project value.

Support

We provide continuous IT support and maintenance, technical assistance, troubleshooting, user training, and documentation to ensure your systems run smoothly and efficiently.

HR/Talent as a Service

We offer talent acquisition and recruitment, employee development and training, and HR consulting services to help you build a capable team aligned with your business goals.

Since 2012, we've been helping financial services organizations align their people, processes, and technology to achieve specific business outcomes. Contact us today to learn more about how your organization can benefit from Fortimize Advisory Services.
